مدل اول: نظرت چیه؟ تا چه حد موافق یا مخالفی؟

EDUCATION IS NOT A LUXURY, BUT A BASIC HUMAN RIGHT AND AS SUCH SHOULD BE FREE FOR EVERYONE IRRESPECTIVE OF PERSONAL WEALTH. (TO WHAT EXTENT) DO YOU AGREE OR DISAGREE?

نت برداری: من موافق آموزش رایگانم چون:

دلیل ۱: تاثیر آموزش روی فرهنگ جامعه

دلیل ۲: آموزش باعث موقعیت شغلی بهتر در آینده میشه

Education needs to be free of charge for all people because it is a fundamental human right and not a luxury. **I completely agree with this opinion, and I will explain my reasons in this essay.**

**First of all**, the effect of education on the culture of a society is really important. **In other words**, when there is free education for everybody, people can easily use it, and it improves their culture very much. **For instance**, in Sweden, Denmark and Finland, people do not pay any tuition fees, so they easily study as much as they want. **As a result**, these countries enjoy a high culture compared to others. People are more educated in these countries and have a high standard of living.

**Furthermore**, getting education creates more and better job opportunities for individuals. **In other words**, when people receive free education, they can study more, and they will have more job options to choose from in the future. **For example**, many Iranians do not have access to free education and have to pay high tuition fees. **As a result**, some of them have to leave school and cannot complete their education. Finally, these people cannot find a good job because they do not have a good education.

**In conclusion, I strongly agree that** education should be free of charge for everyone because it plays a key role in people's culture. **Moreover**, when people do not pay for education, they can study as much as they want and will have more job opportunities in the future.

مدل دوم: هر دو ایده رو بحث کن و نظر خودت رو بگو.

Some people think that this is better to educate boys and girls in mixed schools. Others, however, believe that boys and girls benefit more from attending separate schools.

نت برداری:

دلایل برای گروه اول (موافق آموزش مختلط): ۱- شناخت از جنس مخالف ۲- رقابت بیشتر و در نتیجه درس خواندن

بیشتر

دلایل برای گروه دوم (مخالف آموزش مختلط): ۱- تمرکز کمتر ۲- بعضی از دانش آموزها احساس راحتی نمی کنند

A group of people believe that single-sex education is better. **On the other hand**, other people say that boys and girls should study together. **I will argue both views and give my own idea in this essay.**

When boys and girls study in the same class, they learn more about each other's personality and interests. **In other words**, they know the opposite sex better, and it can help them in communicating with the other sex in the future. **Furthermore**, mixed education helps students to be competitive, and they improve in their studies. **For example**, I remember I was more motivated to study at the university because I wanted to get better marks than boys in our class. This feeling helped me to study more and be more hardworking at that time of my life.

**On the other hand**, when girls and boys study in mixed classes, there is less concentration on the lessons. **In other words**, when boys and girls are in the same class, they do not pay attention to the teacher and cannot learn very well. **Moreover**, some students feel more comfortable and confident when they study with the students of their own sex. **For instance**, in my country, some girls feel shy, and their self-confidence decreases when they have male classmates. As a result, they cannot have very good performance and show all their abilities.

**In conclusion**, I personally believe that **although** mixed education can cause some problems, it is a better option and a more useful one for male and female students.

مدل سوم: مزایا و معایب را توضیح بده.

It is becoming increasingly popular to have a year off between finishing school and going to university.

What are the advantages and disadvantages of this?

نت برداری:

مزایا: ۱- استراحت کردن ۲- فکر کردن درباره رشته تحصیلی

معایب: ۱- دیگه هیچ وقت دانشگاه نمیرن ۲- به زندگی کاری عادت میکنن

These days, it is getting common for students to take a year off after they graduate from secondary school and before they start higher education at the university. **This issue has benefits and drawbacks, and I will discuss some of them in this essay.**

**One of the advantages of** taking a gap year between high school and the **university is that** students can have an opportunity to rest. The final year of secondary school is very challenging, and starting university is also a demanding task. **As a result**, having some rest can refresh students and prepare them for a new stage of education. **Furthermore**, this break provides individuals with some additional time to think about what field they would like to continue at the university. **For instance**, in my country, students go straight from secondary school to university, without learning enough about the major they are planning to study, and so many regret their choices in the future.

**On the other hand, there are some disadvantages. First of all**, many students who take a break between high school and the university never go to university. **In other words**, they usually get jobs and prefer to continue to work and earn money. Moreover, after taking a gap year, a large number of students become interested in a life without studying, and it is really challenging for them to start education again. **For example**, my cousin took a year off after high school and got a job in a supermarket. He is still working there after five years, and he never started education again.

**In conclusion**, having a year off between secondary school and the **university has some positives. On the other hand, there are some negatives as well.**

As a result of tourism, many historical buildings and sites are being damaged beyond repair.

What could be done to prevent this?

نت برداری:

راه های جلوگیری از تخریب بناهای تاریخی به خاطر توریسم:

1 - آموزش مردم درباره اهمیت نگهداری از بناهای تاریخی

2 - محدود کردن تعداد توریست برای بازدید از این بناها

Tourism is getting more and popular around the world. When tourists go to other countries, they damage ancient buildings in different ways. Unfortunately, many of these damages cannot be repaired. **I will discuss** some ways to prevent this issue **in this essay**.

**First of all**, governments and medial must educate people about the importance of historical buildings. **In other words**, when people learn about the value of these buildings, they are more and more careful not to damage them when they visit these beautiful places. **For example**, there is a TV program on Channel 7 Melbourne about the historical buildings in Victoria. Every week they talk about one important old building in Victoria and teach people how to protect these buildings. After watching each part, I really feel I am responsible for keeping these places for future generations.

**Furthermore**, it is very important to limit the number of visitors to ancient buildings. **In other words**, when many tourists visit these places, there is more pressure on the building. As a result, there can be more damage. **For instance**, there is an ancient mosque in a town near Isfahan. Only 20 tourists can visit this mosque every day. It is also very interesting that tourists cannot take pictures because it can harm the building. All tourists respect these limitations and do not break the rules.

**In conclusion**, tourism is damaging historical buildings all over the world. However, there are some ways to prevent this, like educating people about the importance of ancient buildings and letting fewer people visit these places.
